C/015/0015*Re: Emery Deep Mine Permit C/015/015
Amendment to MRP per Mid Term review (bond calculations)
Additional clean copies Task ID #1773

Attn: Daron Haddock

Dear Mr. Haddock:

Per our phone conversation enclosed find 5 additional copies of the above mentioned Amendment. The strikethroughs and underlines have been removed.

If you have any questions concerning this request, please call me at (618) 625-6850.

Sincerely,

John Gefferth
Permit Coordinator

DIV. OF OIL, GAS & MINING

All surface land areas affected by mining activities will be restored in a timely manner and reclaimed as contemporaneously as practicable with mining operations. Seeding and planting of disturbed areas will be conducted immediately after final site preparation and during the first normal period for favorable planting conditions. When necessary to effectively control erosion, any disturbed area will be seeded and planted, contemporaneously with the completion of grading, with the temporary seed mix described in Chapter VIII.C.3 until a permanent cover is established.

UMC 800.11-UMC 800.13, UMC 800.15-UMC 800.50

After the permit renewal application has been approved, but before the permit renewal is issued, a bond or bonds for performance will be filed with DOGM on the required forms furnished by DOGM to comply with UMC 800.11-UMC 800.13 and UMC 800.15-UMC 800.50.

UMC 800.14

The following information applies to the existing and anticipated near future surface disturbances at the Emery Mine. Furthermore it is assumed that these costs shall be updated with each permit renewal and therefore only reflect the cost of reclamation during the permit term. For additional detail of the unit costs and assumptions for this estimate, please refer to Chapter IV.B.
