RE: Consolidation Coal Company - "Emery Deep" Mine - Application for a Permit Revision,
Full Extraction Pillar Splitting Plan, Task No. 2990

Dear Sir or Madam:

This is in response to the Utah Division of Oil, Gas & Mining's (UT-DOGM) June 18, 2008, request for a decision, under 30 CFR 944.30, whether the above subject permit revision constitutes a mining plan modification.

Mining plan approvals by the Secretary of the Interior are required under the Mineral Leasing Act of 1920, 30 U.S.C. 181, *et seq.* before coal mining can occur on Federal lands. This letter serves to document OSM's determination whether or not a mining plan approval from the Secretary is required for the above permitting action.

OSM's review of the Application for a Permit Revision, Full Extraction Pillar Splitting Plan, has determined that it proposes to increase coal recovery by utilizing a full extraction pillar splitting plan for all of the remaining coal reserves to be recovered at the Emery Deep mine, Utah State permit C/015/0015.

Based on a review of the activities associated with the permit revision, OSM has determined that the proposal does not meet the requirements of 30 CFR 746.18(d). Therefore, the proposed permit revision does not constitute a mining plan action requiring Secretarial approval.

OSM's decision was based solely upon the Federal regulations under 30 CFR PART 746 and not the technical aspects of the revision application itself. Consequently, OSM's decision does not relieve UT-DOGM from coordinating the review and approval of the Application for a Permit Revision, Full Extraction Pillar Splitting Plan, with other Federal agencies for compliance with other Federal regulations.

OSM also electronically transmitted the June 18, 2008, request to the Bureau of Land Management and the USDA Forest Service for their review and comment.
