Consolidation Coal Emery Mine Subsidence Report for October 2008

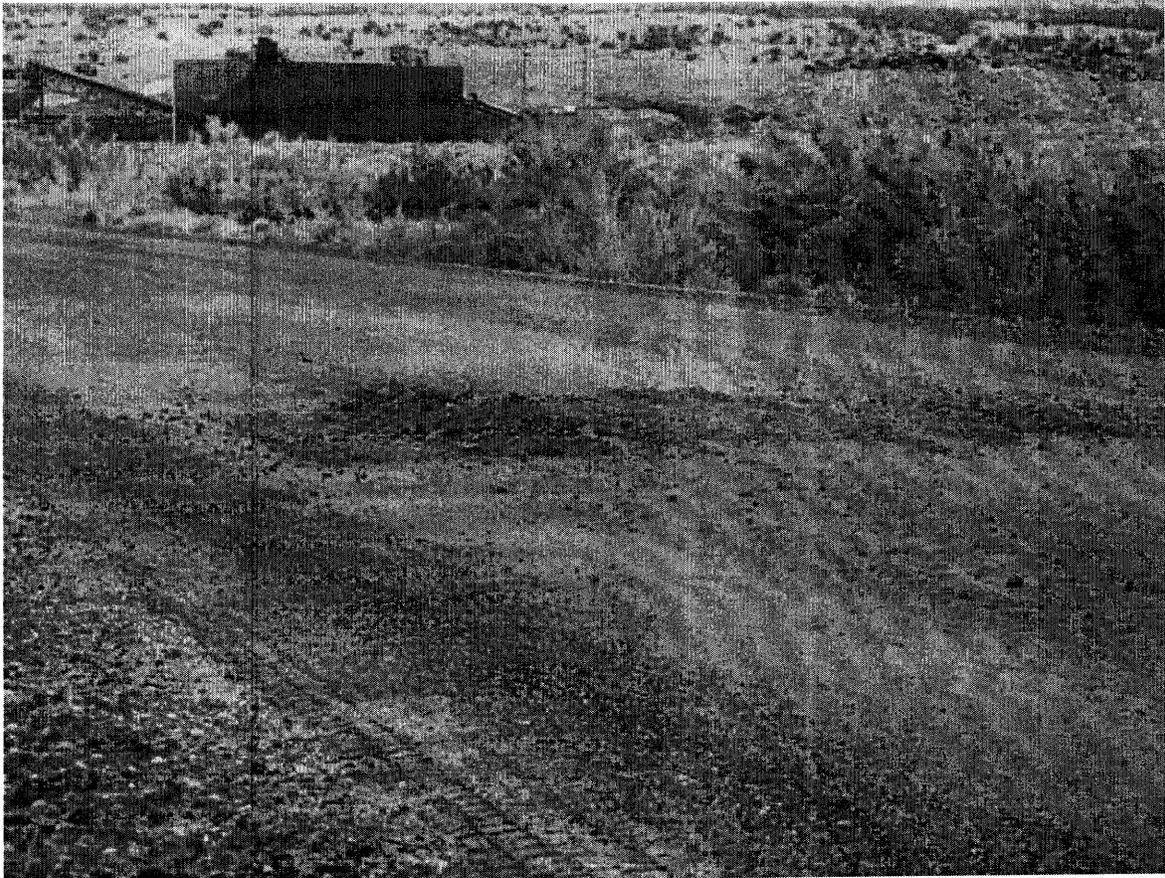

10-30-08

1st North – New cracks noticed over the panel. Cracks are following the face retreat. New cracks are 1 – 2 inches wide. Some of the new cracks are sloughing up to 9 inches wide. Pictures taken. RH

Panel 6 West – Dip in gravel road above panel has developed. It is unknown if the dip is subsidence related, we have not mined in Panel 6 West for several months, or irrigation related, as the water is off for the season. Picture taken.

11-07-08

1st North – Cracks seem to be following the 1st North Panel and are at the bottom of the fence in the pictures. New cracks are 1 to 2 inches wide. Pictures taken.

Below is a summary of the flow data from SP-10 collected by Karla Knoop, from JBR Environmental.

Consol Emery Mine
Panel 14th West
Bryant No. 1
Flow Measurements made at dam
breach
Measurements taken by Karla Knoop

Date	Flow (gpm)
6/13/2007	77
7/24/2007	52
8/28/2007	75
9/20/2007	69
10/19/2007	59
11/15/2007	54
12/17/07	frozen
1/15/08	Flowing under, over & through ice/snow; can't measure, but flow appears to be similar to the November flow rate.
2/26/08	67
3/21/2008	90
4/24/08	35
5/22/08	255
6/25/08	230
7/16/08	355
8/14/08	275
9/10/2008	190
10/21/08	117
11/19/08	48
