

County Road - Cowboy Mine Road No. 915

Map Code: identified on Plate II-3
Status: Existing

This road is used by local farmers and the Live Earth operation.

Storage Area

Map Code: identified on Plate II-3
Status: existing - 4th quarter 2002

The supply yards are located adjacent to the portal ramp, inside the loop entrance road and near the entrance and contains parts and bulk supply items used on a continual basis for either the surface or the underground operation. The yards are used to store inventory parts, machinery, and bulk items in a consistent and easily accessible manner. The supply yards are located within the proposed surface drainage control area and reports to sedimentation pond no. 9.

Airshaft

Map Code: identified on Plate II-3
Status: existing - 4th quarter 2002

The proposed airshaft will be located in the southwest portion of the disturbance area. The 16 ft diameter vertical shaft will be approximately 70 feet in depth. The airshaft and associated exhaust fan and housing is required to ventilate the underground mine workings.

Substation and compressor shed

Map Code: identified on Plate II-3
Status: construct 4th qtr 2008

The proposed substation upgrade will consist of a skid mounted transformer measuring 12' by 30'. The compressor shed will be a wooden tuff shed measuring 12' by 16'.

Rock Dust Bin

Map Code: identified on Plate II-3
Status: existing - 4th quarter 2002

This structure is a supported steel bin 11 ft. in diameter and 38 ft. high. It is used for bulk storage and delivery of rock dust and has a capacity of 100 tons. Surface drainage from the bin area will report to sedimentation pond #9.
