Place: OGMCOAL

R

John,

Quick question...on one of Ingrid's deficiencies she asks for a boiler plate commitment that "if threatened, endangered or sensitive species are found, the Permittee will contact the Division and other regulatory agencies to discuss necessary mitigation or avoidance measures". Where can I find that?

I also found a note to myself to remind you that when the ZZ North application is issued final approval and you start mining it, there's a commitment on page 7 of Chapter V to provide additional roof and floor analysis from the new mine section. Priscilla insisted I remind you of this.

Steve
