Subject: Emery Deep: Permit Renewal
CC: OGMCOAL

John,

I did some poking around and it appears that you need to get a request for permit renewal into us by September 7th, 2010 (which is 120 days prior to the current permit term expiring on January 7th, 2011). Let me know if those dates seem incorrect to you. At any rate, R645-303-230 discusses the permit renewal requirements (i.e. the documentation required as part of the renewal).

Let me know if you have any questions or if I can help on my end.

Regards,
Steve
