John and Peter,

Happy New Year! Hope you had a relaxing holiday. Back to the grind.

I wanted to ask you about the 3rd quarter WQ data for 2010. It does not appear that it's been entered into the database and it was due December 31st. The data needs to be put into the database ASAP. Let me know what the status of that is as soon as you get a chance.

I also wanted to ask what the status was of Richard White's assessment on the water monitoring sites at Emery. We spoke several weeks ago about Richard looking at the impacted/in-accessible wells etc. and adjusting the water monitoring as necessary. Has Richard worked on that? I'm swamped through the end of this month, but while things are slow at Emery, this would be a good time to re-evaluate the water monitoring and amend as necessary.

Talk to you soon,
Steve
