Hi Peter,

Hope you had a relaxing and enjoyable Christmas. I have a couple of questions regarding the 2nd quarter 2011 water quality data for Emery Deep. It appears that nothing was entered for monitoring well T2-U. Additionally, water quality data was entered for the Kemmerer-L well, but no water level was reported. Could you look into this and get back to me.

I can add the data on my end if you can e-mail it to me.

Thanks,
Steve
