Report summary and status for pending enforcement actions, permit conditions, Division Orders, and amendments:

Recent rain storms have produced flash floods which have impacted the 4th East portal area. The flash floods entered the East side of the permit area at the 4th East portal site. Debris and silt have traversed the pad area and placed additional water into the sediment pond located there. The diversion behind the oil storage area has received a heavy sediment load and requires cleaning.

2. Signs and Markers

Signs and markers are in place at both the main facility and the 4th East facility. The signs contain the required information.

4.a Hydrologic Balance: Diversions

The diversion that runs behind the oil storage area has been impacted from flash floods which have entered the permit area and deposited additional sediment into the diversion and in front of the culvert outlet. This diversion and outlet require cleaning. Diversion is Still Functional.

4.b Hydrologic Balance: Sediment Ponds and Impoundments

Most of the sediment ponds contain water from the recent storm events.

7. Coal Mine Waste, Refuse Piles, Impoundments

The refuse pile appears stable. No visible hazards were observed.
