1. Permits, Change, Transfer, Renewal, Sale

There is one permitting action with the Division. It is the "Emery Phase II Additional Permit Boundary". It is schedule to be completely reviewed by the Division on November 16, 2016.

2. Signs and Markers

I inspected the identification sign and it meets the requirements of the R645 Coal Rules at the Emery mine. See Photo

3. Topsoil

I inspected the topsoil piles and I did not see any signs of wind or water erosion. The topsoil piles appear to be stable. See Photo

4.a Hydrologic Balance: Diversions

The diversions and culverts were open and functioning as designed. Sediment has started to fill within these structures. The permittee had cleaned out several diversions since the last inspection. See Photos

4.b Hydrologic Balance: Sediment Ponds and Impoundments

I inspected the sediment ponds throughout the property. They contained some water but were not discharging. It is unlikely these structures will discharge in the near future. The embankments appear to be stable. Inlets and outlets would function as designed. I did not see any hazardous conditions to these structures.

4.d Hydrologic Balance: Water Monitoring

Water monitoring information is taken by the permittee and is sent electronically to the Division in Salt Lake City. This information is reviewed and analyzed by the Division staff. A report is written.

7. Coal Mine Waste, Refuse Piles, Impoundments

I inspected the refuse pile and it appears to be stable. I did not notice any hazardous conditions to the embankments. The refuse pile is active. See Photos

8. Noncoal Waste

The property was clear of non-coal waste materials such as oil, trash and grease cans.

10. Slides and Other Damage

No slides or other damage was notice during the inspection. The mine site appears to be stable.

Permit Number: C0150015
Inspection Type: PARTIAL
Inspection Date: Wednesday, October 26, 2016

16.b Roads: Drainage Controls

I inspected the road diversions and culverts throughout the property. They were functioning as designed. These structures were open.
