Kit,

We're missing water quality data on our end for 1st quarter 2018:

Wells- H-U, R-1 and USGS 4-1

Springs- 11, 13, 14 and 15

Streams- 4,8,9,10, 11 and 12

UPDES- All sites missing entries for January 2018.

I'm out of the office tomorrow for training. Please get the data in by end of business tomorrow so I can the report wrapped up. I go on vacation after Thursday for two week so please let me know when the missing data is in the pipeline.

Thanks,
Steve

Steve,

The "missing" water quality data for 1st Quarter 2018 has been **re-entered** into the database. As you can see by the attached image, it states that the data for Stream 4 is already in the system.

Please do some investigation into the system/database so these problems can possibly be avoided in the future.

Have a great vacation,

Kit
