To: Priscilla Burton <priscillaburton@utah.gov>

Good morning to you Priscilla,

I appreciate you sending me the Plate V-5 map and the mine progress map from the 2017 Annual Report.

I also appreciate you sharing the information regarding the fact that the mine has been encountering water.

I'll pass the information on to our geologists.

I understand about the phone number, now that I have both your direct line and cellular number I'm good!

I appreciated your time 😊

Wayne

Good Morning Wayne,

I have attached the current Plate V-5 from the Emery Mining and Reclamation Plan and the mine progress map from the 2017 Annual Report which shows mining as of December 2017. It is the most current map of the mining on file. In March 2019, we will receive the 2018 mining map with the 2018 Annual Report.

Steve Demczak spoke with Kit Pappas yesterday and learned that the mine has been encountering water. However, they are not discharging the water, they are pumping it back into the old works.

About the phone number....the 613-3737 number is set up to transfer all calls to Karl Houskeeper and cannot be changed. That was implemented by our SLC office. If you call my direct line 613-3733, you will get me or my voice mail.

Thank you for coming in.

Hello Priscilla,

I really appreciated your time meeting with me and getting Steve Demczak and Mark Jones to provide more information and the report that Steve made on Bill's subsidence issue.

I scanned a copy of the report and sent it to our geologists and soil scientists.

I wanted to ask you if you could send me the Plate V-5 map of the area around Bills Farm electronically, then I will pass it on to our geologists and soil scientists.

I also wanted to share with you the bad phone number that I was using—it was 435 613 3737.

I appreciate you giving me both your individual office and cellular phone number. I will enter them into my phone and email so that I won't mess around with the other one!

Thanks again and Happy Trails!

Wayne
