Memorandum

To: Utah Senior Project Manager, OSM, Denver
Attn: Shirley Lindsay

From: Chief, Branch of Mining Law and Solid Minerals, USO

Subject: Utah Power & Light Company, Des-Bee-Dove Mines
Emery County, Utah, Mining, and Reclamation Plan (MRP)
Apparent Completeness Review (ACR)

The subject ACR, consisting of two volumes which was transmitted with your letter dated August 1, 1983, has been reviewed, as requested, for completeness and technical adequacy. We were also asked to analyze the proposed coal recovery procedures and identify any conflicts with future recovery of the coal resources. The subject ACR has been reviewed for conformance with the new 30 CFR 211.10(c) rules effective August 30, 1982, and for compliance to the deficiencies and special requests listed in our memorandum dated July 17, 1981. The July 17, 1981, memorandum is the review for completeness and technical adequacy of the six-volume subject MRP plan which was received in this office on April 27, 1981.

We have determined that the total permit application received in this office will safely obtain maximum economic recovery of the resource using the planned technology and equipment. We did not identify any conflicts with future recovery of the coal resources.

Within the limits of our authority, we recommend approval of the underground mining plan part of the total mining and reclamation plan permit application package.
