REGARDING: Abatement Plans NOV 85-2-22-1
Des-Bee-Dove Mine Sediment Pond Access Road

Dear Mr. Braxton:

Transmitted herewith are seven (7) copies of the abatement plans.

As discussed in my November 19, 1985 letter these plans supersede our earlier submittal.

These plans meet or exceed the Class III standards. Also those areas specified in the memo by David Wham dated December 3, 1985 have been addressed.

Documentation of past usage is listed below:

The new Des-Bee-Dove haul road was completed in the latter part of 1982, usage of the pond access road in its present state is documented after this date:

Pond Cleaning	4th Quarter	1983
Pond Cleaning	4th Quarter	1984
Stand Pipe Maintenance	1st Quarter	1985

The Bureau of Land Management has been contacted concerning this project, specifically a right-of-way extension and installation of the gate at the road entrance. A formal submittal of the right-of-way application will be done by Utah Power and Light.

Your assistance and that of your staff is appreciated. Should further information be needed please contact me.

Sincerely,

Larry J. Guymon, P.E.
Construction Manager
