October 10, 1985

TO: Coal File, Inspection and Enforcement Folder
FROM: Sandy Pruitt, Mining Field Specialist *SP*
RE: Des-Bee-Dove Mine, Utah Power & Light Company, ACT/015/017,
Folder #7, Emery County, Utah

The Des-Bee-Dove/Wilberg Mine junction road was briefly inspected by Sandy Pruitt, accompanied by Larry Guymon, on October 8, 1985. Repairs to the washed-out culvert at the southernmost bridge across a wash had not been started yet at the time of this inspection.

Larry Guymon reported that no work had been initiated to repair erosion on the Beehive Substation pad. The erosion stabilization plans approved August 1985 are scheduled to be implemented on Monday, October 14, 1985.

Mr. Guymon also reported that a salt storage bin is currently being designed. Complete installation of the bin is required before winter of this year.
