RE: Permit Review, Utah Power & Light Company,
Des-Bee-Dove Mines, ACT/015/017, #2, Emery County, Utah

Attached is the Des-Bee-Dove Technical Analysis (TA) from the Office of Surface Mining (OSM). They have issued their permit as of June 20 or 21, 1985.

We need to analyze the TA and identify any areas which we just cannot live with. This should be similar to how we handled the Trail Mountain permit.

Please proceed as follows:

1. read the TA and identify any problem areas;
2. write up your concerns in paragraph format for inclusion into a letter;
3. for each concern, write a specifically worded stipulation which will also be included in a letter.

Please give me your write-up by July 10. Thank you.
