## INSPECTION REPORT

Partial:  Complete:  Exploration:

Inspection Date & Time: December 11, 1998, 10:00 to 11:40 AM

Date of Last Inspection: September 30, 1998

Mine Name: Des Bee Dove County: Emery Permit Number: ACT/015/017

Permittee and/or Operator's Name: PacifiCorp/Energy West Mining Company.

Business Address Box 1008, Huntington, Utah 84528

Type of Mining Activity: Underground  Surface  Prep. Plant  Other

State Official(s): Paul Baker

Company Official(s): Dennis Oakley

Federal Official(s): None Weather Conditions: Clear, 20's

Existing Acreage: Permitted- 2660 Disturbed- 34 Regraded-      Seeded-      Bonded- 34 Increased/Decreased: Permitted- -187 (compared to last inspection report) Disturbed- -44 (compared to last report--no new bond release) Regraded- 0

Seeded- 0 Bonded- -44 (compared to last inspection report--no new bond release)

Status: Exploration/Active/Inactive/X Temporary Cessation/ Bond Forfeiture

Reclamation (Phase I/Phase II/Final Bond Release/Liability Year)

### REVIEW OF PERMIT, PERFORMANCE STANDARDS & PERMIT CONDITION REQUIREMENTS

#### Instructions

- Substantiate the elements on this inspection by checking the appropriate performance standard.
  - For complete inspections provide narrative justification for any elements not fully inspected unless element is not appropriate to the site, in which case check N/A.
  - For partial inspections check only the elements evaluated.
- Document any noncompliance situation by referencing the NOV issued at the appropriate performance standard listed below.
- Reference any narratives written in conjunction with this inspection at the appropriate performance standard listed below.
- Provide a brief status report for all pending enforcement actions, permit conditions, Division Orders, and amendments.

## INSPECTION REPORT

(Continuation sheet)

Page 2 of 2

PERMIT NUMBER: ACT/015/017

DATE OF INSPECTION: December 11, 1998

(Comments are Numbered to Correspond with Topics Listed Above)

Very little has changed since the last inspection. There have been some rockfalls but nothing that appeared to need maintenance.

#### 4. Hydrologic Balance

##### a. Diversions

There is a culvert leading from the pad where storage facilities used to be. A rabbitbrush plant that was in front of this culvert has been cleared.

#### 15. Cessation of Operations

Earlier this year, a company broke the portal seals and was doing some exploration to determine if further mining would be feasible and economical. In the last inspection, we tried to see whether the portals had been resealed, but we couldn't see well enough. Mr. Oakley said the portals were not resealed.

The plan says the portals have been temporarily sealed, and the permittee needs to reseat them. The site is gated and the portals fenced, but this is not very secure. Also, gas coming from one of the mines could, theoretically, poison a person standing near a portal. It is expected that reclamation may begin soon, and if this is true, there is no reason not to seal the portals now. This would also be in the permittee's best interest from a liability standpoint.
