INSPECTION REPORT

Partial: X Complete: Exploration:
 Inspection Date & Time: 7/13/00 7:30 a.m. to 4:00 p.m.
 Date of Last Inspection: 6/27/00

Mine Name: Des Bee Dove County: Emery Permit Number: ACT/015/017
 Permittee and/or Operator's Name: PacifiCorp/Energy West Mining Company
 Business Address Box 1008, Huntington, Utah 84528
 Type of Mining Activity: Underground X Surface Prep. Plant Other
 State Official(s): Susan White
 Company Official(s): Dennis Oakley
 Federal Official(s): Jed Jensen (Forest Service)
 Weather Conditions: Fair and Hot
 Existing Acreage: Permitted- 2760 Disturbed- 24 Regraded- Seeded- Bonded- 24
 Increased/Decreased: Permitted- 0 Disturbed- 0 Regraded- 0 Seeded- 0 Bonded- 0
 Status: Exploration/ X Active/ Inactive/ Temporary Cessation/ Bond Forfeiture

REVIEW OF PERMIT, PERFORMANCE STANDARDS & PERMIT CONDITION REQUIREMENTS

Instructions

1. Substantiate the elements on this inspection by checking the appropriate performance standard.
 - a. For complete inspections provide narrative justification for any elements not fully inspected unless element is not appropriate to the site, in which case check N/A.
 - b. For partial inspections check only the elements evaluated.
2. Document any noncompliance situation by referencing the NOV issued at the appropriate performance standard listed below.
3. Reference any narratives written in conjunction with this inspection at the appropriate performance standard listed below.
4. Provide a brief status report for all pending enforcement actions, permit conditions, Division Orders, and amendments.

INSPECTION REPORT
(Continuation sheet)

PERMIT NUMBER: ACT/015/017

DATE OF INSPECTION: 7/13/00

(Comments are Numbered to Correspond with Topics Listed Above)

This partial inspection included only an inspection of the Maple Gulch Portals. The portals are very remote requiring a two-hour hike to the Beehive Portal and another ½ hour to hour to hike to the Desert Portal. The portals were accessed from the Huntington Power Plant near the Deer Creek Mine.

3. TOPSOIL

Topsoil for the Maple Gulch Portal reclamation will be taken from the surrounding disturbed and undisturbed soils. Likely, a large amount of rock will be on the surface since the area is below a sandstone outcrop.

9. PROTECTION OF FISH, WILDLIFE AND RELATED VALUES

The Deseret Portal will be reclaimed after July 17. The portal is within a half mile radius of an active golden eagle nest, although not within direct site of the portal. No restrictions were placed on the Operator by the USFWS. However, the Operator thought it would be best to delay the reclamation until this time.

Dennis Oakley and I looked for bats in the Deseret Portal with a small Mag-lite. No bats were seen. However, I felt like the small flashlight did not provide sufficient light to fully assess the presence or absence of bats. No guano or insect parts were observed on the floor or portal opening.

12. BACKFILLING AND GRADING

The Beehive Portal was being backfilled by hand labor during this site inspection. Aerated concrete block was airlifted into the site to use as fill. Material from above the portal was being shoveled and pushed into the portal opening. The crew was trying to pry large boulders on to the backfilled area.

The Deseret Portal is very small and hidden by vegetation. Little highwall was exposed when constructing the portal. Disturbance should be minor to surrounding vegetation during reclamation.
