Dear Interested Party:

This letter is sent to inform you that Energy West Mining Company, a subsidiary of PacifiCorp, has filed an application for Phase I bond release of the Des Bee Dove Mine site, Permit Number C/015/0017. The purpose of this action is to commence responsibility release procedures for this area. Currently, a surety bond is filed with the Division of Oil, Gas and Mining in the amount of \$1,837,712.00 and is payable to the State of Utah, Division of Oil, Gas and Mining (DOG M), and the Office of Surface Mining Reclamation and Enforcement (OSM). PacifiCorp requests that the bond liability amount for the Des Bee Dove mine site and pumphouse area be reduced by 60%. The bond for these specific areas equal \$1,113,324.00. Reducing this amount by 60% is equal to \$445,330.00. Total surety bond held for all of the Des Bee Dove Mine will be reduced to \$1,169,718.00 at the completion of the Phase I Bond Release.

This parcel of land contains approximately 29.5 disturbed acres and is contained in the E $\frac{1}{2}$  of Section 26 and the W $\frac{1}{2}$  of Section of 25, Township 17 South, Range 7 East, SLBM. The permit area originally encompassed approximately 2,760 acres. In 2001, the permit boundary was reduced to approximately 154 acres.

Utah Power & Light mined nearly 13 million tons of coal from the time of purchase in 1971 until the portals were permanently sealed in 1987. Yearly coal production peaked in 1982 at 1.2 million tons.

The final reclamation of the Des Bee Dove mine concludes more that 100 years of mining at this site. Final reclamation began in 1998 with the recontouring of the pumphouse area situated down canyon from the main mine facilities. In 1999, Energy West removed the remaining surface facilities throughout the mine site. In 2000, two remote ventilation portals were reclaimed. Phase 1 reclamation was completed in 2002 which entailed the backfilling and grading of the area containing the Little Dove and Beehive portals. Phase 2 reclamation was completed in 2003 and involved backfilling and grading of the Deseret Mine portals, bathhouse, and storage yard facilities, construction of a drainage channel, and removing and recontouring the mine access road. Final reclamation of the sedimentation pond was completed in January 2006.
