*Governor*GARY R. HERBERT
*Lieutenant Governor***Inspection Report**

Permit Number:	C0150017
Inspection Type:	BOND RELEASE
Inspection Date:	Wednesday, December 03, 2008
Start Date/Time:	12/3/2008 11:30:00 AM
End Date/Time:	12/3/2008 1:00:00 PM
Last Inspection:	

Inspector: Jim Smith, Environmental Scientist IIIWeather: Cold and clearInspectionID Report Number: 1886

Accepted by:

Representatives Present During the Inspection:	
Company	Guy Davis Environmental Scientist
Company	Dennis Oakley Environmental Engineer
BLM	Sue Wiler
BLM	Mike Robinson
BLM	Connie Leschin
OGM	April Abate Hydrologist
OGM	Ingrid Wieser Range Scientist
OGM	Pete Hess Environmental Scientist III
OGM	Jim Smith Environmental Scientist III
OGM	Joe Helfrich Environmental Scientist III
OGM	Priscilla Burton Environmental Scientist III

Permittee: **PACIFICORP**Operator: **ENERGY WEST MINING CO**Site: **DES BEE DOVE MINE**Address: **PO BOX 310, HUNTINGTON UT 84528**County: **EMERY**Permit Type: **PERMANENT COAL PROGRAM**Permit Status: **RECLAIMED**

Current Acreages

134.31	Total Permitted
36.02	Total Disturbed
	Phase I
	Phase II
	Phase III

Mineral Ownership

- Federal
 State
 County
 Fee
 Other

Types of Operations

- Underground
 Surface
 Loadout
 Processing
 Reprocessing

Report summary and status for pending enforcement actions, permit conditions, Division Orders, and amendments:

This was a Phase I bond release inspection. The Permittee published notification of the application for bond release in the Emery County Progress on August 19, 26, September 2, and 9, 2008. An invitation letter was sent to parties of interest on November 19, 2008, and the on-site inspection was done on Wednesday December 3, 2008. The Phase I bond release area consisted of the access road to the sediment pond created in the 1980s and later reclaimed in January 2006. The remote Deseret and Beehive portals in Maple Gulch were also included in the Permittee's bond release submittal, but these remote sites were not visited as part of this inspection.

Note: This inspection report does not constitute an affidavit of compliance with the regulatory program of the Division of Oil, Gas and Mining.

REVIEW OF PERMIT, PERFORMANCE STANDARDS PERMIT CONDITION REQUIREMENTS

1. Substantiate the elements on this inspection by checking the appropriate performance standard.
 - a. For COMPLETE inspections provide narrative justification for any elements not fully inspected unless element is not appropriate to the site, in which case check Not Applicable.
 - b. For PARTIAL inspections check only the elements evaluated.
2. Document any noncompliance situation by reference the NOV issued at the appropriate performance standard listed below.
3. Reference any narratives written in conjunction with this inspection at the appropriate performance standard listed below.
4. Provide a brief status report for all pending enforcement actions, permit conditions, Divison Orders, and amendments.

1. Permits, Change, Transfer, Renewal, Sale

The post mining land use for the disturbed area was changed and approved in February of 2007. The Land use now includes grazing, wildlife habitat, recreation and industrial/commercial uses.

3. Topsoil

The small area held by the BLM located just off the road was pocked with topsoil. Minimal vegetation growth was noted in this area. The former access road followed an ephemeral drainage channel. Pocking was noted along the banks of the drainage and appeared to be filling in with sediment within the individual pocks. Vegetation appears to have started to take hold along the former access road.

4.a Hydrologic Balance: Diversions

The main channel has been restored and appears to be functioning. No flow was observed in the channel at the time of the inspection, but it had appeared to have been flowing recently.

4.b Hydrologic Balance: Sediment Ponds and Impoundments

All impoundments, including the sedimentation pond, have been removed.

4.d Hydrologic Balance: Water Monitoring

There is no water monitoring at this site.

4.e Hydrologic Balance: Effluent Limitations

The sedimentation pond has been removed and there is no water monitoring at this site.

16.a Roads: Construction, Maintenance, Surfacing

The sedimentation pond access road has been completely removed.
