OK

Suzanne,

The IR is done and the submittal is ready for technical review.

EWMC has responded to the deficiencies. The deficiencies address information on soil depths and redistribution that is not in the current MRP. EW states in the cover letter that an update of the MRP with this information is forthcoming as an amendment to the MRP; that they will submit an updated Volume XVI, Phase 3 Reclamation Plan with the information in this response when the Phase I Bond Release is approved.

Hello Jim,

Task #3221 is the new task for the Des Bee Dove Bond Release, the previous task #3043 was made history when the deficiency reponse was received. The new due date is 3/25.

The team assignments still need to be made...I wasn't sure who you needed this go around.

Thanks!  
Suzanne
