2. Signs and Markers

The identification sign is located on the trail to the property. Information contained the information required in the R645 Coal Rules.

3. Topsoil

All topsoil was used in reclamation. There were no signs of erosion on the reclaimed lands.

4.a Hydrologic Balance: Diversions

Several diversions were spot-checked and had function as designed in the recent rain storms.

4.c Hydrologic Balance: Other Sediment Control Measures

The entire site is pocked to prevent sediment from leaving the reclaim area. The trail which is not pocked has small areas of erosion. This is caused by water from lands above crossing the trail to lower ground. Permittee has committed in fixing the erosion on the trail.

8. Noncoal Waste

The mine site was clear of non-coal waste materials.

10. Slides and Other Damage

No slides or damage was noticed during the inspection.

12. Backfilling And Grading

The mine site is completely backfilled and graded.

13. Revegetation

The mine site has been seeded and vegetation is growing on the site. I am not qualified to say how good or bad the vegetation is performing. In laymen opinion is appear to be doing well.

17. Other Transportation Facilities

The trail used to herd cattle up to the upper plateau has some minor areas of erosion. Permittee plans on fixing the trail. This area will not be stable due to cattle using the trail.

18. Support Facilities, Utility Installations

There are no facilities.

21. Bonding and Insurance

The insurance will expire on Aug. 28, 2009.
