### Report summary and status for pending enforcement actions, permit conditions, Division Orders, and amendments:

I went to the Energy West main office in Huntington, Utah. I tried to contact five people using the outside phone at the office. The five people from the engineering department were not available to let me in the office for inspection. I proceeded to do the inspection by myself.

The site is totally reclaimed using all available soil.

The permittee received Phase II bond release.

The reclaim site could use some rainfall. The site is dry.

**1. Permits, Change, Transfer, Renewal, Sale**

There are no permitting actions taking place with the Division at this time.

**2. Signs and Markers**

The identification sign is located on the path to the reclaimed site. It contains all the required information to meet the minimum requirements of the R645 Coal Rules.

**3. Topsoil**

The topsoil was dry and rainfall would be nice for the vegetation. The topsoil was stable.

**4.a Hydrologic Balance: Diversions**

I inspected the diversions. They were open and stable.

**4.c Hydrologic Balance: Other Sediment Control Measures**

The site is completely pock for sediment control and for vegetation growth.

**8. Noncoal Waste**

The site was clear of non-coal waste materials.

**13. Revegetation**

Vegetation was growing on the slope of the reclaim site. The vegetation could use some rainfall.
