Memo to Coal File:

RE: Utah Power & Light
Deer Creek Mine
ACT/015/018-A

The Deer Creek Mine of Utah Power and Light was inspected on July 18, 1979 by Tom Suchoski and Mike Thompson.

It was observed that the sign was in place. A notice of violation was recently issued for the sign by the Office of Surface Mining.

The dam for the sediment pond was in place and discharge structures operational. A crew was drilling the pond area and additional dress-up work is required. Construction of the buried pipe diversion is still in progress.

K. MICHAEL THOMPSON
ENGINEERING GEOLOGIST
