Inspection Memo
to Coal File:

RE: Utah Power & Light Company
Wilberg Mine - ACT/015/018-B
Deer Creek Mine - ACT/015/018-A
Emery County, Utah

On May 12, 1982, Biologist Steve Cox, Soils Specialist Everett Hooper, and Engineer Tammy Balkenbush were accompanied on a tour of Wilberg and Deer Creek mining operations by a representative of Emery Mining Corporation. The basic purpose of the tour was to observe the operations at both mines. We observed sedimentation ponds, drainage areas, vegetation, and the general mine workings. The trip was also to familiarize the engineer with underground coal mining.

Tamara J. Balkenbush
