Memo to Coal File:

RE: Utah Power & Light Company
Deer Creek Mine - ACT/015/018-A
Wilberg Mine - ACT/015/018-B
Emery County, Utah

On February 10, 1982, Biologists Sue Linner, Lynn Kunzler, Steve Cox, and Mary Boucek and Inspector Dave Lof met with Larry Guymon of Emery Mining Corporation to tour the Deer Creek and Wilberg Mines. The idea of the tour was to get a general view of the layout and facilities at the two mines and to specifically view and discuss any areas pertinent to vegetation or wildlife. Several areas have been revegetated at the Wilberg Mine with little success. Reference areas at the two sites were pointed out and a proposed deer crossing at the Deer Creek Mine was discussed. Since the disturbance was done pre-law, no topsoil is available for use in reclamation.
