3. Narrative:

(Brief explanation of reasons for any changes made in assignment of points and any additional information that was presented at the conference.)

The operator successfully demonstrated that he was not required by law, his permit, or the Division directive to have water monitoring data available at the minesite at the frequency required by the inspector. The operators NPDES permit and reporting records and his approved hydrologic monitoring plan flow data and water quality information reports were each in order. Thus the violation is vacated.
