RE: Deer Creek Water Supply Line (Amended Plan), MRP
Amendment, Deer Creek Mine, Utah Power and Light
Company, ACT/015/018, File #2, Emery County, Utah

The proposed Amended Plan for Deer Creek Water Supply Line, submitted September 12, 1986, should have little, if any, additional impact on the vegetation, wildlife and soil resources as compared to the approved MRP Amendment. The proposed changes (Areas A and B) are still within, or adjacent to, previously disturbed areas. I feel the operator should commit to interim revegetation of Area B as well as Area A, and also to installing temporary sediment controls at Area B. I recommend approval of this Amended Plan.
