RE: Deer Creek Water Supply Line, MRP Amendment, Deer
Creek Mine, Utah Power and Light Company,
ACT/015/018, File #2, Emery County, Utah

The proposed eight-inch underground water supply line and storage tank resubmittal of August 1, 1986 addressed two deficiencies, design map certification and the reclamation cost estimate. The estimated reclamation cost for this facility is adequate and will be added at mid-term review. All of the maps are now certified.
