RE: Deer Creek Water Supply Line, MRP Amendment, Deer
Creek Mine, Utah Power & Light Co., ACT/015/018
#2, Emery County, Utah

The proposed MRP amendment dated May 20, 1986 and supplemented with certified maps and a reclamation cost estimate on July 31, 1986 is sufficient from a vegetation and wildlife perspective. The storage tank and water line will be installed within or immediately adjacent to disturbed and frequently traveled areas. No additional disturbance of wildlife is expected. The disturbance will be reclaimed in conjunction with existing facilities at the mine.

I recommend approval of the amendment.
