Dear Sir:

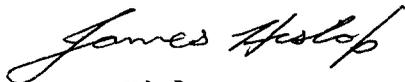

Please find enclosed two copies of planned mining sequence map of the Blind Canyon Seam at Deer Creek Mine as revised on August 11, 1987, as requested by Pamela Greebaugh-Lettig, reclamation engineer.

As you can see, we thought better off having our longwall panels to the west of 3rd South running north/south and reverted back to our original east/west pattern.

This revision should hold good for now. However, if we are forced to develop our longwall panels with more than two entries, changes in pillar sizes, recovery percentages and longwall face widths may be necessary.

I trust these maps are satisfactory. If you require further information, please feel free to contact me.

Yours truly,

James Hislop  
Director, Technical Services
