DIVISION OF
OIL, GAS & MINING

September 21, 1988

Mr. John Whitehead, Permit Supervisor
State of Utah
Division of Oil, Gas and Mining
3 Triad Center, Suite 350
355 West North Temple
Salt Lake City, Utah 84180-1204

Re: Mid-Term Review, Utah Power & Light Company,
Deer Creek Mine, ACT/015/018, Folder #2,
Emery County, Utah

Dear Mr. Whitehead:

The following information relates to Division comments regarding the Deer Creek Mine mid-term review of August 30, 1988.

UMC 782.13 - Identification of Interests (PGL)

Three (3) copies of Page 1-2 are attached with the appropriate correction.

UMC 784.13 - Reclamation Plan: General Requirements (PGL,BAS)

(b) (2) Costs for item 1-H "Water Storage Tank" has been revised to \$11,288. Three (3) copies of the amended page are attached.

UMC 817.43 - Diversions (TM)

As a response to the N.O.V. issued by OSM during June 1988 (UP&L is currently pursuing the vacation of this violation) UP&L submitted complete design calculations for the disturbed drainage structures in July 1988. Upon approval by your staff of this information it will be appropriately inserted into the permit.

UMC 817.52 - Hydrologic Monitoring (RVS, TM)

The Division's request for inflow water monitoring is appropriate. However, the logistics of valid inflow monitoring do not seem possible considering that most of the water inflow is at the longwall face. UP&L is desirous to provide the appropriate

information to the Division in a workable format. It is suggested that a site visit in the mine by Division technical staff, along with UP&L hydrologists, be conducted soon. After this visit it is felt that a workable solution can be found.

Please contact me if you have further questions.

Sincerely,

David Smaldone
Director of Permitting,
Compliance & Services
Mining Division
