Re: Permit Application - Deer Creek Waste Rock Storage Facility
ACT/015/018

Dear Mr. Harvey:

Recently, I have been provided with a copy of the above referenced document by the Division of Oil, Gas & Mining. After my review, it would appear that the only permits needed to comply with the regulations of the Division of Water Rights will be the completion of the enclosed Form R69, for each of the sedimentation facilities. In accordance with your plan, one should be submitted for Phase 1 at your earliest convenience. The structure under Phase 2 should not be permitted until a short time prior to the construction of that phase, which according to the plan, will be some fifteen years in the future. Prior to the construction of either of the sedimentation facilities, approval must first be obtained from the Division of Water Rights.

If you have any questions concerning the enclosed form or this Division's involvement in this project, please feel free to contact me.

Sincerely,

Mark P. Page
Area Engineer
