Re: Monitor Well Application #91-93-03MW
Rilda Canyon - Geotechnical Borings

Dear Mr. Webster:

The above referenced Monitor Well Application was received in this office November 24, 1991. After reviewing the application and the proposed operating plan for the geotechnical drilling program and reflective seismograph work, it appears that this does not fall within the permitting jurisdiction of this Division. As a result, this application will remain in our files, however, no formal approval will be required prior to beginning the work.

As this project proceeds, I would encourage you to protect the integrity of the Rilda Springs culinary water source which is used by the North Emery Water User's Association.

Your cooperation in this matter is appreciated. Should you have any questions, please feel free to contact me.

Sincerely,

Mark P. Page
Regional Engineer
