Re: Division Order, Permit Deficiency - Sediment Pond, PacifiCorp Electric Operations, Deer Creek Mine, ACT/015/018, Request for Response Extension

Dear Mr. Braxton:

As we discussed by phone yesterday, work is continuing in response to the above-referenced Division Order dated June 5, 1991 and received June 13, 1991. We have completed the field work which includes a complete resurvey of the Deer Creek sediment pond and modification of the spillway invert. Remaining office work includes modification and recertification of cross-sections and as-built drawings. We have prepared modified drawings for drafting today and expect drawings to be redrafted and certified in one more week.

Completion of our detailed permit deficiency response is beyond the 30 days granted in the Order. We respectfully request an additional 7 days to complete our response.

Your consideration is appreciated.

Sincerely,

J. Blake Webster
Permitting Administrator
