inspection report

Permit No. ACT/015/018

Inspection Date 15 May 1991

Permittee/Operator Name PacifiCorp Electric Operations

Business Address P.O. Box 310

City Huntington State Utah Zip 84528

Mine Deer Creek  Surface  Underground  Other

County Emery State Utah

Company Official(s) Guy Davis

State Official(s) Jess Kelley

Time of inspection 9:30  a.m.  p.m. to 3:00  a.m.  p.m.  Partial  Complete

Date of last inspection 11 April 1991 Weather conditions Clear and sunny

Acreage 14,668  Permitted 56  Disturbed  Regraded  Seeded 56  Bonded

Enforcement Action None

COMPLIANCE WITH PERMITS AND PERFORMANCE STANDARDS

## INSPECTION REPORT COMMENTS

Permit No. ACT/015/018

Inspection Date 15 May 1991

Please number comments to correspond with topics on previous page.

### 2. SIGNS AND MARKERS

-The disturbed area boundary is not clearly marked in the terraced area south of the office/bathhouse/parking area. Two or three disturbed area markers need to be placed in this area to mark the disturbed area from the office and bathhouse to the coal surge bin. This must be done by no later than June 3, 1991.

### 4. HYDROLOGIC BALANCE

(b) Diversions--The drop drain northeast of the parking lot, inlet #4, and the truck loadout ditch have been cleaned, as suggested in inspection report 4/11/91 by Bill Malencik.

(c) Sediment Ponds and Impoundments--The concrete sediment trap by the tipple was cleaned, as suggested in inspection report 4/11/91 by Bill Malencik. There is some cable and corrugated metal between the main haul road and the sedimentation pond that must be removed and disposed of in a noncoal waste collection area.

(d) Other Sediment Control Measures--Silt fences adjacent to the beltline have been repaired and the material cleaned from the beltline at transfers C-1 and C-2 has been removed, as suggested in inspection report 4/11/91 by Bill Malencik. Several inlets to the 24" disturbed culvert that parallels the haul road were found to be partially blocked. These were cleaned during the inspection. The operator is advised to pay particular attention to these and all other diversion

inlets as the thunderstorm season has arrived.

#### 13. REVEGETATION

Vegetation is well-established in the areas which were seeded last Fall. These include the area of the Deer Creek Fan and the areas below the sedimentation pond which were damaged during the last cleaning of the pond. In addition, the banks of the pond itself are showing an abundant growth of grass and some leafy plants.
