To all Operators

Dear Operator:

Re: Submittal of Annual Report for 1991, Company Name, Mine Name, Permit Number, Folder #2, County, Utah <sup>ACTIONS 1018</sup>

Enclosed please find the annual report information sheet and 1991 monitoring report to be submitted for the above noted mine(s). I have enclosed what I believe is a current list of outstanding permit stipulations, conditions, and Division Orders for your operation. Please review this list to ensure timely resolution of outstanding issues.

Please submit all of the information by March 31, 1992.

If you have any questions, please call me.

Sincerely,

A handwritten signature in black ink, appearing to read 'L. Braxton'.

Lowell P. Braxton  
Associate Director, Mining

Deer Creek Mine  
Attachment "A"  
Special Conditions  
September 13, 1988

ACT/015/018

Ongoing

Condition No. 7

- A. The applicant shall restore areas impacted by subsidence caused surface cracks or other subsidence features such as escarpments (not to include naturally occurring escarpments which are not a result of mining) which are of a size or nature that could, in the Division's determination, either injure or kill grazing livestock. Restoration shall include recontouring of the affected land surface including measures to prevent rilling, and revegetation in accordance with the approved permanent revegetation plan in the PAP. Restoration shall be undertaken after annual subsidence survey data indicate that the surface has stabilized, but in all cases, restoration and revegetation shall be completed prior to bond release.
- B. The applicant shall compensate surface owners, except for land owned by the applicant, for lands which cannot be safely grazed due to hazards caused by surface effects of subsidence, with land (in close proximity) of comparable size and grazing capacity to be used for grazing until restoration of the damaged land is achieved.
- C. The applicant shall compensate at a fair market value, owners of livestock which are injured or killed as a direct result of surface hazards caused by subsidence.
