**RE: WASTE ROCK SAMPLING AMENDMENT, PACIFICORP, DEER CREEK MINE,  
ACT/015/018, EMERY COUNTY**

Dear Pamela,

I am enclosing the following revised pages (revised 3/4/93) which, when approved, will replace the pages of the same numbering in Vol. 10 of the permit. An explanation of each page follows for better understanding of the proposed amendment.

**Pages 7-4 and 7-5**

We have noticed redundant sampling because of the bi-annual sampling commitment which is currently in the permit. Past analytical results indicate the refuse to fall within the Division's "Guidelines For Management of Topsoil and Overburden". PacifiCorp proposes to sample the upper one (1) foot of the refuse lifts when the elevation is within four (4) feet of the final reclamation surface elevation. The samples will be analyzed for the parameters currently listed in the permit.

Analytical results are proposed to be included in the annual report.

Upon approval, PacifiCorp will send additional copies of the revised pages.

If you have any questions, please call Guy Davis or me at 653-2312.

Sincerely,

Val E. Payne  
Sr. Environmental Engineer
