Re: Determination of Administrative Completeness, Rilda Canyon Surface Facilities, PacifiCorp, Deer Creek Mine, ACT/015/018-94E, Folder #2, Emery County, Utah

Dear Mr. Payne:

The Division has reviewed the March 29, 1994 application along with supplemental information provided for permitting the Rilda Canyon Surface Facilities. The information has been found to be adequate to determine the Permit Application Package ("PAP") administratively complete. A technical review has been initiated and you have already been sent the results of the initial review of your plans. The technical review should be completed around the end of October.

At this time you should publish a Notice of Complete Permit Application as required by R645-300-121. A copy of the publication notice should be sent to the Division as soon as it is available. Also, a copy of your application should be placed on file in the county recorders office during the public notice and comment period. You should also submit 3 additional copies of the plan to the Division for distribution to other agencies. The Division will notify all other interested agencies and allow for their comment prior to making a final decision to approve or disapprove the Rilda Surface Facilities application.

Thank you for your help during the permitting process. Please feel free to contact me if you have questions.

Sincerely,

A handwritten signature in black ink that reads "Daron R. Haddock".

Daron R. Haddock  
Permit Supervisor
