PERMIT NUMBER: ACT/015/018

DATE OF INSPECTION: 4/18/95

(Comments are Numbered to Correspond with Topics Listed Above)

#### 4. HYDROLOGIC BALANCE:

a. Diversions - The culvert inlet near the tire storage dock required cleaning although still apparently functional. Recent runoff from precipitation was observed and all observed drainages appeared to be functioning as designed.

c. Other Sediment Control Measures - The operator stated that the sediment containment box had been recently cleaned. The function of the box is to prefilter runoff prior to entering the sediment pond in order to reduce the frequency of cleaning of the sediment pond. There was a noticeable difference in the color of the water entering the box verses coming out of the box.

#### 7. COAL MINE WASTE/REFUSE PILES/IMPOUNDMENTS

Slopes on the refuse pile are to be reduced, a plan to accomplish this is to be finalized by mid May.
