RE: Waste Water Absorption Field Improvement, PacifiCorp, Deer Creek Mine, ACT/015/018-97E, Folder #2, Emery County, Utah

I have reviewed the aforementioned submittal as you requested. It appears that what the permittee has submitted is adequate.

ENGINEERING:

The information which has been submitted meets the requirements of the R645 regulations.

RECOMMENDATION:

Based on the information which has been submitted, I would recommend that this amendment be approved. This should be done, however, with the stipulation that any major changes necessary, or if a finalized design cannot be agreed upon (based on the results of the soil classification and percolation tests required by the Department of Environmental Quality, Southeastern Utah District Health Department), then a new submittal shall be made.
