**Date:** Wed, Dec 1, 1999 12:10 PM  
**Subject:** Rilda Canyon Access Extension

As we discussed, access to Rilda Canyon is restricted from December 1 through April 15 as stipulated by DWR:

Stipulation 10 "Usage of the Rilda Canyon Road will be limited to the period from April 15 through December 1, or as directed by the Utah Division of Wildlife Resources to avoid impacts to big game during the critical winter season."

Due to the above normal temperatures and lack of precipitation, big game migration to lower elevations has been delayed. Energy West contacted DWR (Chris Colt) on November 29 and the USFS (Carter Reed) on November 30 with a request to extend the deadline until December 3. Energy West received verbal approval from DWR on November 30 and USFS on December 1.

As I stated, Deer Creek is currently preparing for a longwall move scheduled for December 6 and the additional haulage time frame will be extremely helpful.

Thanks for your help.
