Approved to go ahead as we discussed on Friday, February 1.

>>> "Semborski, Chuck" <chuck.semborski@pacificorp.com> 02/01/02 05:27PM >>>

Pam,

As we have discussed, to prevent a possible delay to future reclamation activities due to the proximity of the raptor nest (mandatory time frame limitation - continuous use), Energy West will conduct several minor projects. These projects will involve:

- 1) Finalize removal of remaining concrete structures
  - a) Deseret Coal Storage Area - concrete bunker
  - b) Deseret "Old Rail Tipple" - concrete supports
- 2) Re-compaction of bathhouse pad spoil material
- 3) General non-coal waste cleanup - guardrails, miscellaneous steel supports

Nielson Construction will mobilizing the necessary equipment Monday February 4, 2002. Demolition of the concrete structures will be initiated on February 5, 2002.

If you have any questions please call.

Thanks for help.
