RE: PacifiCorp. - "Deer Creek" Mine - Application for a Permit Revision, Waste Rock Site Road Improvement

Dear Sir or Madam:

This in response to the Utah Division of Oil, Gas, & Mining's (UT-DOGM) April 28, 2004, request for a decision, under 30 CFR 944.30, whether the above subject permit revision constitutes a mining plan modification.

Mining plan approvals by the Secretary of the Interior are required under the Mineral Leasing Act of 1920, 30 U.S.C. 181, *et seq.* before coal mining can occur on Federal lands. This letter serves to document OSM's determination whether or not a mining plan approval from the Secretary is required for the above permitting action.

OSM's review of the Application for a Permit Revision, Waste Rock Road Improvement, has determined that it revises the text in Volumes 2 and 10 to address deficiencies found during UT-DOGM's reviews of an August 28, 2003 permit revision to address improvements to an access road leading to a rock waste disposal site at the Deer Creek mine, Utah State permit C/015/018. Changes in the text of Volumes 2 and 10 were also necessary to address the road's reclassification from an ancillary road to a primary road to comply with the Utah Coal Regulations.

Based on a review of the activities associated with the permit revision, OSM has determined that the proposal does not meet the requirements of 30 CFR 746.18(d). Therefore, the proposed permit revision does not constitute a mining plan action requiring Secretarial approval.

OSM's decision was based solely upon the Federal regulations under 30 CFR PART 746 and not the technical aspects of the revision application itself. Consequently, OSM's decision does not relieve UT-DOGM from coordinating the review and approval of the Application for a Permit Revision, Waste Rock Road Improvement with other Federal agencies for compliance with other Federal regulations.

OSM also electronically transmitted the April 28, 2004 request to the Bureau of Land Management and the U.S. Forest Service for their review and comment.

In an electronic transmittal dated May 12, 2004 the Bureau of Land Management stated in its opinion the Waste Rock Road Improvement permit revision did not does not constitute a mining plan action requiring Secretarial approval.

The U. S. Forest Service did not provide any comments in the thirty day time frame established by the Federal regulations under 30 CFR 944.30, Article VI. D.

Please notify the applicant of our decision on this matter.

Should you have any questions regarding this letter or approval, please contact Carl R. Johnston, Utah Federal Lands coordinator, at (303) 844-1400, extension 1500.

Sincerely,

Ranvir Singh
Manager, Northwest Branch
