**TOTAL HISTORY POINTS 3**

**II. SERIOUSNESS (Either A or B)**

NOTE: For assignment of points in Parts II and III, the following apply:

1. Based on facts supplied by the inspector, the Assessment Officer will determine within each category where the violation falls.
2. Beginning at the mid-point of the category, the Assessment Officer will adjust the points up or down, utilizing the inspector's and operator's statements as guiding documents.

Is this an EVENT (A) or HINDRANCE (B) violation? Hindrance

A. EVENT VIOLATION (Max 45 pts.)

1. What is the event, which the violated standard was designed to prevent?

2. What is the probability of the occurrence of the event, which a violated standard was designed to prevent?

<u>PROBABILITY</u>	<u>RANGE</u>
None	0
Unlikely	1-9
Likely	10-19
Occurred	20

**ASSIGN PROBABILITY OF OCCURRENCE POINTS \_\_\_\_\_**

**PROVIDE AN EXPLANATION OF POINTS:**

3. What is the extent of actual or potential damage? RANGE 0-25

In assigning points, consider the duration and extent of said damage or impact, in terms of area and impact on the public or environment.

**ASSIGN DAMAGE POINTS \_\_\_\_\_**

**PROVIDE AN EXPLANATION OF POINTS:**

B. HINDRANCE VIOLATION (Max 25 pts.)

1. Is this a POTENTIAL or ACTUAL hindrance to enforcement? Actual

RANGE 0-25

Assign points based on the extent to which enforcement is actually or potentially hindered by the violation.

**ASSIGN HINDRANCE POINTS 13**

**PROVIDE AN EXPLANATION OF POINTS:**

***\*\*\*The permittee did not take fields measurements of pH and specific conductivity for third quarter of 2003 for several water monitoring locations. As a result, the Inspector could not verify the monitoring for the third quarter of 2003. It is important that these measurements be taken in the field as they are subject to change over time. The Permittee did have pH and specific conductivity analyzed in the laboratory. Other parameters were analyzed for these sites but it is now impossible to get the field data for this quarter. Because there is actual hindrance, points are assessed in the upper half of the range although the seriousness is considered minor and is assessed at the low end.***

III. NEGLIGENCE (Max 30 pts.)

- A. Was this an inadvertent violation which was unavoidable by the exercise of reasonable care? IF SO--NO NEGLIGENCE; or, was this a failure of a permittee to prevent the occurrence of a violation due to indifference lack of diligence, or lack of reasonable care, or the failure to abate any violation due to the same? IF SO--GREATER DEGREE OF FAULT THAN NEGLIGENCE.

No Negligence	0
Negligence	1-15
Greater Degree of Fault	16-30

STATE DEGREE OF NEGLIGENCE Negligence

ASSIGN NEGLIGENCE POINTS 7

PROVIDE AN EXPLANATION OF POINTS:

***\*\*\*The permittee stated that four teams would go out at the same time to collect water samples and there was not enough testing equipment for each team to test for pH and conductivity. This does not alleviate the permittee from conducting monitoring according to the approved plan. It is felt that failing to take the field measurements shows lack of diligence in following the plan. This equates to the middle of the negligence range.***

IV. GOOD FAITH (Max 20 pts.)

(Either A or B)

(Does not apply to violations requiring no abatement measures)

- A. Did the operator have onsite, the resources necessary to achieve compliance of the violated standard within the permit area?  
IF SO--EASY ABATEMENT

Easy Abatement Situation

C	Immediate Compliance	-11 to -20*
	(Immediately following the issuance of the NOV)	
C	Rapid Compliance	-1 to -10
	(Permittee used diligence to abate the violation)	
C	Normal Compliance	0
	(Operator complied within the abatement period required)	
	(Operator complied with condition and/or terms of approved Mining and Reclamation Plan)	

\*Assign in upper or lower half of range depending on abatement occurring the 1st or 2nd half of abatement period.

- B. Did the permittee not have the resources at hand to achieve compliance, or does the situation require the submission of plans prior to physical activity to achieve compliance?

IF SO--DIFFICULT ABATEMENT

Difficult Abatement Situation

C	Rapid Compliance	-11 to -20*
	(Permittee used diligence to abate the violation)	
C	Normal Compliance	-1 to -10*
	(Operator complied within the abatement period required)	
C	Extended Compliance	0
	(Permittee took minimal actions for abatement to stay within the limits of the NOV or the violated standard of the plan submitted for abatement was incomplete)	
	(Permittee complied with conditions and/or terms of approved Mining and Reclamation Plan)	

EASY OR DIFFICULT ABATEMENT? \_\_\_\_

ASSIGN GOOD FAITH POINTS \_\_\_\_\_

**PROVIDE AN EXPLANATION OF POINTS:**
