The data for 82-51 3rd qtr. And July, August, and September elevations for TM-3 are checked and ready to upload into the DOGM database. This should complete the 3rd qtr water data submittal.

Dennis,

I have uploaded all of the information for Cottonwood/Wilberg, Deer Creek, Des-Bee-Dove, and Trail Mountain #9 from the pipeline into the

database. A report is attached.

As a reminder, according to parameters set by the assigned hydrologist, you are still missing monthly flow data for TM-3 (July, Aug, Sep), and a quarterly sample for spring 82-51. Please let me know if your MRP does not require these samples, and I will remove them from the list.

The Main N Main E, and TW-10 samples were already in the permanent database, so I erased the ones in the pipeline.

Please let me know if you have any questions or need anything further from me.

Thank you,
