

0037

Deer Creek Mine to the Utah Department of Natural Resources, Oil and Gas and Mining (UT-DOG M). The PAP proposed constructing mine ventilation fan, an office/bathroom/warehouse facility, and other associated surface support facilities on 13 acres of Federal coal leases U-06039, U-2810, SL-050862, and SL-051221. UT-DOG M approved the permit revision on July 27, 2005. Under the Mineral Leasing Act of 1920, the Assistant Secretary, Land and Minerals Management, must approve, approve with conditions, or disapprove the mining plan modification for the Federal leases. OSM is recommending approval of the mining plan modification without special conditions.

The FONSI is based on the EA dated June 24, 2005, titled *Deer Creek Coal Mine, Mining Plan Modification, Federal Coal Leases U-06039, U-2810, SL-050862, and SL-051221, Emery County, Utah*, prepared by OSM and UT-DOG M in cooperation with the U. S. Forest Service and the Bureau of Land Management. Copies of the documents can be obtained from the U.S. Office of Surface Mining/DOI, Western Regional Office, Program Support Division, P.O. Box 46667, Denver, Colorado 80201-6667.

NOTICE

A notice of intent for the following project submitted in accordance with §R307-401-1, Utah Administrative Code (UAC), has been received for consideration by the Executive Secretary, Utah Air Quality Board:

Company Name: XTO Energy, Inc.
Location: The Huntington Plant, UTM Coordinates 466.520 km East 4,355.220 km North, Zone 12

Project Description: XTO Energy operates a compressor station consisting of a 530 horse powered compressor engine, two dehydration units, an amine unit and four tank heaters for the Huntington natural gas processing facility located in Emery County, which is an attainment area of the National Ambient Air Quality Standards (NAAQS) for all pollutants. The company has requested to replace the natural gas engine with up to five electric motors. New Source Performance Standards (NSPS), National Emission Standards for Hazardous Air Pollutants (NESHAP) and Maximum Available Control Technology (MACT) regulations do not apply to this source. Title V of the 1990 Clean Air Act does not apply to this source. The current emissions, in tons per year, are as follows: NO_x 8.95, CO 7.51, VOC 9.95, and HAPs 0.80. The proposed emission changes are: PM₁₀ 0.04, NO_x 0.55, CO 0.46, VOC 9.95 and HAPs 0.27. The changes in emissions will result in the following, in tons per year, potential to emit totals: PM₁₀ = 0.04, NO_x = 9.50, CO = 7.97, VOC = 19.90, and HAPs = 0.53.

The completed engineering evaluation and air quality impact analysis showed that the proposed project meets the requirements of federal air quality regulations and the State air quality rules. The Executive Secretary intends to issue an Approval Order pending a 10-day public comment period. The project proposal, estimate of the effect on local air quality and draft Approval Order are available for public inspection and comment at the Utah Division of Air Quality, 150 North 1950 West, Salt Lake City, UT 84114-4820. Written Comments received by the Division at this same address on or before August 26, 2005, will be considered in making the final decision on the approval/disapproval of the proposed approval order. Email comments will also be accepted at ehe@utah.gov. If anyone so requests to the Executive Secretary at the Division in writing within 10 days of publication of this notice, a hearing will be held in accordance with R307-401-4, UAC.

LEGAL NOTICE

**FERRON/PRICE RANGER DISTRICT
MANTI-LA SAL NATIONAL FOREST
EMERY COUNTY, UTAH**

The Ferron/Price Ranger District, Manti-La Sal National Forest, is evaluating the possible environmental effects of a proposal from Energy West/PacifiCorp to conduct a hydrologic investigation in the Right Fork of Rilda Canyon (Sec. 29, T. 16 S., R. 7 E., SLBM) and in Mill Fork Canyon (Sec. 21, T. 17 S, R. 7 E, SLBM). The purpose of the investigation is to further study the feasibility of developing a new water collection system for the North Emery Water Users Special Service District. The drilling would occur on National Forest System lands administered by the Manti-La Sal National Forest.

The proposal is to drill 4 holes, a maximum of 60 feet deep. Access to the drill sites would be on existing roads. Drilling would be done along existing roads with a truck-mounted rig. Surface disturbance would be less than 100 sq. ft. per site, and would be reclaimed to Forest Service specifications. Since the project, as proposed, would have minimal disturbances to land and resources, it is anticipated this may be categorically excluded from further NEPA analysis (EA or EIS) under category 31.2(8), Forest Service Handbook, 1909.15.

The public is invited to comment on the proposed actions. Substantive comments are those within the scope of, are specific to, and have a direct relationship to the proposed action, and include supporting reasons that the Responsible Official should consider in reaching a decision. Comments received in response to this solicitation, must include name, organization and address of those who comment, and will be considered part of the public record for this project. Comment should be sent to Tom Lloyd, Ferron/Price Ranger District, Manti-La Sal National Forest, Box 310, Ferron, Utah 84523, by September 2, 2005.

For further information, contact Tom Lloyd at (435)384-2372.
