OFFICIAL NOTICE

Under the Surface Mining Control and Reclamation Act of 1977 (30 U.S.C. 1201 et seq. SMCRA), the Western Regional Office-Denver of the U. S. Office of Surface Mining (OSM) gives notice of the availability of a Finding of No Significant Impact (FONSI) and environmental assessment (EA) prepared for a Federal mining plan modification in Utah. This action involves a proposal by PacifiCorp to construct new surface facilities in conjunction with the Deer Creek underground coal mine in Rilda Canyon on Federal coal leases with the surface land managed by the Manti-La Sal National Forest. The proposed action in Rilda Canyon is located in Section 28, T. 16 S., R. 7 E, SLM, Emery County, Utah.

PacifiCorp submitted a permit application package (PAP) for a permit revision for the Deer Creek Mine to the Utah Department of Natural Resources, Division of Oil, Gas and Mining (UT-DOG M). The PAP proposed constructing mine portals, a mine ventilation fan, an office/bathhouse/warehouse facility, and other associated surface support facilities on 13 acres of Federal coal leases U-06039, U-2810, SL-050862, and SL-051221. UT-DOG M approved the permit revision on July 27, 2005. Under the Mineral Leasing Act of 1920, the Assistant Secretary, Land and Minerals Management, must approve, approve with conditions, or disapprove the mining plan modification for the Federal leases. OSM is recommending approval of the mining plan modification without special conditions.

The FONSI is based on the EA dated June 24, 2005, titled *Deer Creek Coal Mine, Mining Plan Modification, Federal Coal Leases U-06039, U-2810, SL-050862, and SL-051221, Emery County, Utah*, prepared by OSM and UT-DOG M in cooperation with the U. S. Forest Service and the Bureau of Land Management. Copies of the documents can be obtained from the U.S. Office of Surface Mining/DOI, Western Regional Office, Program Support Division, P.O. Box 46667, Denver, Colorado 80201-6667.

LEGAL NOTICE

**FERRON/PRICE RANGER DISTRICT
MANTI-LA SAL NATIONAL FOREST
EMERY COUNTY, UTAH**

*2/015/0215
Internal*

The Ferron/Price Ranger District, Manti-La Sal National Forest, is evaluating the possible environmental effects of a proposal from Energy West/PacifiCorp to conduct a hydrologic investigation in the Right Fork of Rilda Canyon (Sec. 29, T. 16 S., R. 7 E., SLBM) and in Mill Fork Canyon (Sec. 21, T. 17 S, R. 7 E, SLBM). The purpose of the investigation is to further study the feasibility of developing a new water collection system for the North Emery Water Users Special Service District. The drilling would occur on National Forest System lands administered by the Manti-La Sal National Forest.

The proposal is to drill 4 holes, a maximum of 60 feet deep. Access to the drill sites would be on existing roads. Drilling would be done along existing roads with a truck-mounted rig. Surface disturbance would be less than 100 sq. ft. per site, and would be reclaimed to Forest Service specifications. Since the project, as proposed, would have minimal disturbances to land and resources, it is anticipated this may be categorically excluded from further NEPA analysis (EA or EIS) under category 31.2(8), Forest Service Handbook, 1909.15.

The public is invited to comment on the proposed actions. Substantive comments are those within the scope of, are specific to, and have a direct relationship to the proposed action, and include supporting reasons that the Responsible Official should consider in reaching a decision. Comments received in response to this solicitation, must include name, organization and address of those who comment, and will be considered part of the public record for this project. Comment should be sent to Tom Lloyd, Ferron/Price Ranger District, Manti-La Sal National Forest, Box 310, Ferron, Utah 84523, by September 2, 2005.

For further information, contact Tom Lloyd at (435)384-2372.
