Jerriann,

As per our phone conversation today, Map MFS1888B shown on the C1C2 form was a misprint and should be removed. This map is located in Deer Creek Volume 11 (Moose Habitat Map).

Also, our copy of Map MFS1839D in the Confidential Volume shows no gas buffer zone. You indicated that the map you have in your file is from year 2003. As promised, I will have a replacement map sent to you for you Volume.

Best Regards,

Dennis Oakley

You know that gas buffer zone amendment that we tired over and over. Well it's back.

I was just incorporating and noticed two things that need to be looked into:

- Listed on the C1C2 form is MSF1888B, but I could not find MFS1888B in: your submittal, Vol. 12 Chap 3, or listed in the List of Maps.
- I followed the C1C2 for MFS1839D, but this map should've had the gas

buffer zone removed.

Would you mind helping me out on these two items.

Thanks
