**Attachments:** Deer Creek Canyon XTO Well.pdf

Bart,

Nice to talk to you on the phone today. I'm sending you some of the correspondence and a map of the XTO well and access road plotted with Deer Creek's permit area and structures. We had a meeting with XTO permitting and construction personnel 2/26 in which we went through the list of concerns that I am sending you.

Our main concerns at this point are:

Proximity of the projected road to our mining structures (conveyor belt and septic leach field) and prevention of damage to these structures by construction activity or road traffic.

Interference with permitted sediment control structures within our permit area (some of these are still under the snow) by road and pad construction.

How XTO will prevent sediment from entering Deer Creek within our permit area.

We had a nice meeting, XTO indicated a willingness to possibly re-arrange road alignments and sediment control structures to work with us. We will probably be asking XTO to enter into a Memorandum of Understanding with us regarding potential legal issues that might arise.

I look forward to meeting with you on the 19th at our office.

Thanks,

Ken Fleck
